

AMENDMENT IN THE CLAIMS

Listing of Claims:

1. (currently amended) A liquid agent which is stable on storage and in emulsion and is used in wet dressing of leather and fur, comprising which agent includes as components:
 - a) lubricant,
 - b) retanning agent, and
 - c) substances regulating the pH value,as well as optional further components, and enables the operations of neutralizing, retanning and lubricating in one single bath and in one single step, wherein characterized in that unsaturated fats, oils or waxes of natural or synthetic origin are used as starting materials in the production of said lubricant, which are subjected to an oxidative treatment prior to further chemical reaction.
2. (currently amended) The agent for wet dressing of leather or fur according to claim 1, wherein characterized in that the iodine number is reduced by at least 20 units in said oxidative treatment, and that the oxidative treatment is performed using atmospheric oxygen or other suitable oxidizing agents.
3. (currently amended) The agent for wet dressing of leather or fur according to claim 1, wherein characterized in that said further chemical reaction of the fats, oils and waxes treated by oxidation is sulfation, phosphating, ethoxylation, amidation or and/or reaction to yield sulfosuccinates, or a combination of these processes.
4. (currently amended) The agent for wet dressing of leather or fur according to claim 1, comprising including
 - a) 10 – 90 wt.-% of a lubricant,
 - b) 10 – 90 wt.-% of a retanning agent,

U.S.S.N. 10/069,159

Reply to Office Action dated March 19, 2004

Amendment dated July 19, 2004

- c) 1 – 10 wt.-% of a substance regulating the pH value, and
 - d) 0 – 30 wt.-% of further additives.
5. (Currently Amended) Use of the agent according to any of claims 1 to 4 in the form of an aqueous solution or dispersion for finishing leather or fur in one single bath and in one single treatment step.
